(a)
Claims on NEU-DET
Claims on GC10-DET
Smallest gain one run resolves, NEU-DET
Same, GC10-DET
Number of evaluations
Claimed gain over baseline, mAP@0.5 (pp)
(b)
GC10-DET
NEU-DET
Seeds needed per model
True gain to detect, mAP@0.5 (pp)
(c)
Published gains, median and interquartile range
3.8 [2.1, 6.8]
Smallest gain one run per model resolves, NEU-DET
2.2–3.5
Smallest gain one run per model resolves, GC10-DET
4.0–5.5
Same, if the two models use different splits (NEU-DET)
7.9
Leakage effect on the full test set
+0.38 [-0.29, +1.06]
Leakage effect on leaked test images only
+4.08 [+1.79, +6.37]
Difference in test mAP@0.5 (pp)
